MODULES ON ODOO 19

October 2025 to September 2026 · verified module by module against the git history · only modules where I am the main author

PROFILE

B.Sc. in Computer Science from UANL. I design and build the software that keeps Mexican companies running on Odoo: the parts that must **reconcile with the tax authority (SAT), get paid on time and stamp without errors**. I work end to end, from requirements with the client to automated tests and production support, with tested code that others can maintain.

EXPERIENCE

Technical consultant and Odoo developer

AUG 2025 – TODAY

Integra Informática Administrativa · Monterrey, Mexico

- **91 modules for 22 companies** on Odoo 17, 18 and 19: accounting, CFDI, payroll and IMSS, treasury, inventory, sales and integrations.
- End-to-end Mexican localization: CFDI 4.0 and complements, DIOT, SAT XML, Banxico and DOF, customs entries, IMSS, INFONAVIT, FONACOT, SUA and profit sharing.
- Integrations with idempotent webhooks, REST and XML-RPC APIs, **X12 EDI over AS2 to SAP** and AI (Google Gemini) with validated output.
- Treasury for 10 Mexican banks with automatic reconciliation and **217 tests** making sure every peso reconciles.
- Migrations to Odoo 19 and modules that bring back features the new version removed; custom QWeb and Excel reports.
- Production support and troubleshooting on Odoo.sh: logs, fixes and deployments without stopping operations.

Full-stack developer

JAN – JUN 2025

FCFM Library · Universidad Autónoma de Nuevo León

- Three systems in production: loans, attendance control and library inventory.
- Flask, SQL Server and SQLite, bcrypt authentication, Chart.js dashboards and PDF and Excel reports.
- Desktop app with barcode scanning, packaged with PyInstaller.

EDUCATION

B.Sc. in Computer Science

2021 – 2025

Universidad Autónoma de Nuevo León · School of Physical and Mathematical Sciences

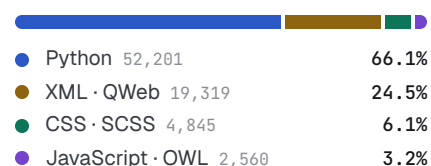

FOCUS AREAS

- CFDI 4.0
- Payment complement
- Hydrocarbons & fuels
- Payroll & IMSS
- SUA · IDSE
- Profit sharing (PTU)
- INFONAVIT · FONACOT
- DIOT
- Customs entries
- Banxico · DOF
- Bank reconciliation
- X12 EDI · AS2
- SEPOMEX

TOOLS

- ODOO**
ORM · OWL · QWeb · l10n_mx_edi · hr_payroll · account · stock · mail · ir.cron
- BACKEND & DATA**
Python · PostgreSQL · SQL · xlswriter · openpyxl · requests · Flask · Pandas
- INTEGRATION**
REST · webhooks · XML-RPC · X12 EDI · AS2 · Banxico SIE · Google Gemini
- OPERATIONS**
Odoo.sh · Linux · Red Hat · Docker · Git · Ansible · JavaScript

CODE BY LANGUAGE

78,925 lines of my own code across the 91 modules.

See it working

Seven animated case studies and the catalog of all 91 modules.

jesusgarza.pages.dev

SELECTED WORK

Real client problems, solved in production. Each one has an animated walkthrough on the portfolio.

01

TREASURY · OD00 19 · FGH, IKIGAI, MACSA, MAGER

Ten banks, *one source of truth.*

Parsers for 10 banks with duplicate-free re-imports; counterparty matching by CLABE, account, RFC or name with an AI fallback (Gemini, validated JSON and a confidence threshold); pruned subset-sum reconciliation, automatic payment complements and a 30-day cash-flow forecast.

14,729 lines 217 tests 10 banks

02

INTEGRATIONS · OD00 19 · IKIGAI TO SAP

Odoo notifies. *The X12 travels on its own.*

Validating a picking records a notice with an idempotency key and a unique constraint; a webhook wakes the middleware, which builds the X12 944, 945, 947 or 852 and sends it over AS2. Request, response and MDN are logged, with cron retries.

1,296 lines 4 X12 documents 0 duplicates

03

CFDI 4.0 · OD00 18 AND 19

The XML the SAT *actually accepts.*

Hydrocarbons & Fuels complement with CNE permit validation; IMMEX tax legends; guards against stamping to XAXX010101000. When the PAC started rejecting payment complements (CRP20268, CRP20274), the BaseDR and ImporteDR fix shipped in three days.

8 CFDI modules 3 days to respond

04

PAYROLL · IMSS AND SUA · OD00 18 AND 19

Social security contributions, *day by day.*

Daily calculation with the UMA in force, a 25-UMA cap, excess over 3 UMA and tranches when the salary changes; employer old-age rate by salary band; validated IDSE and SUA files and reconciliation against the IMSS statement and FONACOT.

10,839 lines 13 contribution concepts

05

PAYROLL · PROFIT SHARING · OD00 18 · AVALIA

One person, three companies, *one payout.*

Union-find with path compression to merge records sharing CURP, RFC or social security number across legal entities; 50% by days and 50% by salary with an annual cap, and a safeguard that stops the run if the cents are not just rounding.

2,717 lines 3 identifiers

06

ACCOUNTING · FX RATE · OD00 18

The exchange rate, *on the right date.*

Odoo recorded the FIX rate one day off from the official gazette. The module queries series SF43718 from Banxico's SIE API and records the right date; if Banxico doesn't answer, native behavior is kept.

SF43718 Banxico series 0 days of offset

07

CUSTOMERS · ADDRESSES · OD00 17

Addresses that *actually exist.*

ZIP code checked against a local SEPOMEX catalog, state compared accent-insensitively and city with fuzzy similarity (0.86 threshold). In the online store, a ZIP that doesn't match the state blocks checkout.

0.86 similarity threshold 0 external APIs

All seven cases, animated
Each case is explained in under a minute, with chapters and the module's real code.
jesusgarza.pages.dev/#casos

RECOGNITION

EGEL	Outstanding Performance Award · EGEL-CENEVAL	2025
UANL	Recognition letter for three systems built for the library	2025

RED HAT CERTIFICATIONS

RH124	Red Hat System Administration I	2024
RH134	Red Hat System Administration II	2024
RH294	Linux Automation with Ansible	2024

“

He proved to be a very valuable member thanks to his great sense of responsibility and attention to detail. His initiative and commitment exceeded expectations, bringing significant improvements to our Library's internal processes.

DEPUTY DIRECTOR OF QUALITY AND EDUCATIONAL INNOVATION · FCFM, UANL
